

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ELECTRIC VEHICLES REVOLUTION

Class R (LU0903875457)

a Sub-Fund of SYMPHONIA LUX SICAV

This Fund is managed by MDO Management Company S.A.

OBJECTIVES AND INVESTMENT POLICY

The Sub-fund's objective is to provide long term capital growth by taking a flexible investment approach.

The sub-fund invests in equity and debt securities, with no restrictions in terms of asset class, currency or geographic exposure.

Equity investments focus mainly on companies that will benefit from the upcoming trends in the Automotive industry. In particular, the sub-fund concentrates investment in sectors related to hybrid and electric vehicles and, to a lesser extent, to innovations associated with self-driving systems and intelligent vehicle technologies.

Equity investments consider large, medium and small sized company securities with diversified exposure by geography and sector. However, in specific market environments a significant concentration in particular countries or sectors may occur.

The sub-fund's net asset balance may be held in cash or invested in debt securities, including bonds, debentures and notes of governmental and private issuers with no credit rating restrictions.

Currency exposure may be up to 100% of the sub-fund's net assets, regardless of the nature of the instruments. In any case, currency exposure may be reduced through hedging operations.

The sub-fund may invest up to 10% of its net assets in Units of UCITS authorised according to Directive 2009/65/CE and/or other

UCIs, subject to the restrictions in Appendix I.

The sub-fund may buy or write options on equities or stock market indices with the intent to globally hedge its assets against the risk of unfavourable developments in financial markets.

It may also buy or sell futures on market indices, subject to the restrictions in Appendix II.

The sub-fund may also invest in financial derivative instruments as further described in the prospectus.

The Net Asset Value ("NAV") of the sub-fund is calculated on daily basis. Redemption requests may be made in writing on each NAV valuation before 13:00h CET (dealing cut off time).

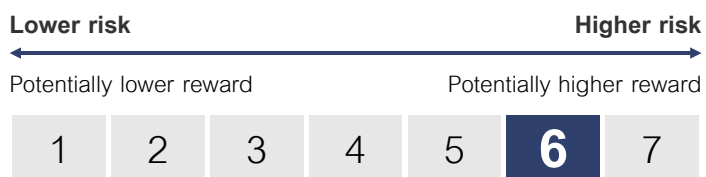

For significant redemptions, more than 5% of total assets, a non-standard procedure may be applied.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Income generated is reinvested.

The reference currency of the sub-fund is EUR.

RISK AND REWARD PROFILE

The risk and reward indicator illustrates where the sub-fund is positioned in terms of its possible risk and reward. The higher the sub-fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. The risk indicator is calculated using proxy or historical data which cannot be used as a prediction for the future. The risk classification may change over time. A fund in the lowest category does not mean a risk-free investment.

The sub-fund has been placed in category 6. The sub-fund is subject to a high level of risk typical of equity markets, such as macro-economic trends at a global level, inflation, interest rate fluctuations, evolution of corporate income, issuer-stability, and currency movements.

Risks which are not adequately captured by the synthetic indicator but which can affect the sub-fund are:

Credit risk - the possibility that a debtor will not meet their repayment obligations.

Liquidity risk - when particular investments are difficult to purchase or sell.

Operational risks - due to technical issues for example natural disasters, misunderstandings and fraud.

Emerging market risk - Investing in emerging markets and less developed markets securities poses risks different from, and/or greater than, risks of investing in the securities of developed countries. In Emerging markets the legal, judicial and regulatory frameworks are still developing so there is, for local market participants and their counterparties, a high degree of uncertainty. In addition, there is a tendency for low market capitalisation which is inherently volatile and illiquid.

Risk of investments in non-related target funds – may result in a double payment of investment management fees.

A full explanation of all the risks affecting the sub-fund is included in the prospectus.

CHARGES FOR THIS FUND

One-off charges that may be taken before or after you invest

Entry charge	4.00%
Exit charge	1.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	2.31%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	The performance fee is 20% of returns in excess of ICE BofAML Euro Treasury Bill Index plus 200 basis points on a yearly basis. In any case the percentage limit of the performance fees may not exceed 4% (Fee Cap). In the Fund's last financial year the performance fee was 8.41% of the Fund.
-----------------	--

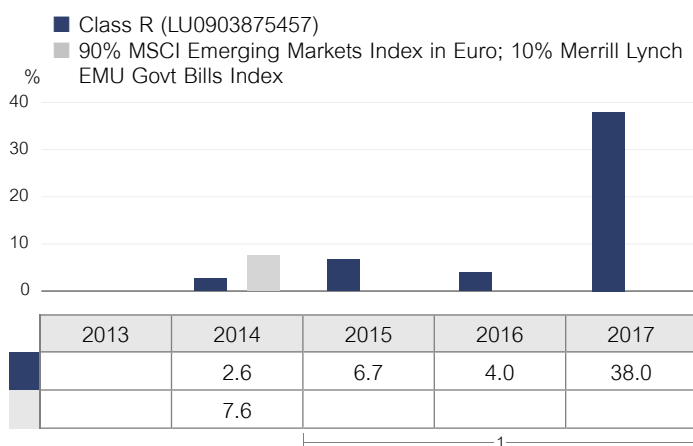

More detailed information on charges can be found in the prospectus. The charges paid by the investors are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of the investment.

The entry and exit charges shown are maximum figures. In some cases you may pay less - contact your financial advisor or distributor to find out the actual amount.

The ongoing charges, which can vary from year to year and include investment management, management, administration and custodial fees. They do not include portfolio transaction costs except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund. Full details on the exact charges and costs are published in the annual report of the fund.

The ongoing charges are calculated as at 31 December 2017.

PAST PERFORMANCE

1 Since June 2015 the benchmark has been removed.

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and you may not get back the amount originally invested.

The sub-fund was launched on 26/09/2013.

All sub-fund performance data are on a NAV to NAV basis excluding entry and exit charges.

Performance is shown in EUR.

Benchmark: 90% MSCI Emerging Markets Index in Euro and 10% Merrill Lynch EMU Govt Bills Index..

The sub-fund changed its name and investment objective on 19 June 2015 and the benchmark has been dropped.
